To Whom It May Concern:

It is my pleasure to strongly recommend the services of Mr. Larry A. Johnson, P.A., and Kitchen Tech as an outstanding and well qualified commercial food facilities designer and project manager, especially in the area of club houses.

In early 2003 the City of Fort Collins Golf Division opened a brand new 15,000 square foot \$2.65 million Clubhouse building at our Collindale Golf Course, and Larry Johnson provided us with the design consulting expertise, installation, and problem solving in our kitchen, restaurant, and snack bar area of the facility. I was especially pleased that Larry was not only able to stay within his budget, but he actually saved us a considerable amount of money on our kitchen costs, while still providing us with good quality equipment and products. In addition, once the project was completed, Larry did not just walk away, but he followed-up with us for many months after the Grand Opening to make sure everything was running as it was designed. He made me feel comfortable, which is very important to me.

This is not an endorsement from the City of Fort Collins, but from me serving in my capacity as the Manager of the Golf Division of the City, and as someone who worked with Larry Johnson from the very early stages of the Collindale Clubhouse Project. Larry was able to understand our vision, financial circumstances, and physical restrictions, and was able to blend those with the reality of providing a top quality final product that the City can be proud of having available for its citizens. Again, I fully recommend Mr. Larry A. Johnson, P.A. and Kitchen Tech.

Sincerely,

Jerry P. Brown
Manager of Golf
